Colourscope®

Your Personal Inner Colour

*Colours effects us more
than you'd think*

*The body needs every
colour in the right
amount*

Every one of us is born, into a personal inner colour-combination and vibration that one cannot change. We bring with us this colour shade in our luggage for our entire life. The colours weave themselves into each other and surround your body on all planes: physically, mentally and spiritually

We are each born with a unique colour frequency that is a part of the Sacred Geometry encoded in our DNA. This vibration lays an energetic foundation that affects our behaviour and our destiny. Learn how to decipher your birth colour and to understand how colours affect every aspect of your life.

Private sessions will be available

For more information contact: Barbara 323-660-4949 or Sheri 626-840-4215

After 30 years of research and work Theresa Blomqvist is the first to have developed and established a way to connect the various colour energies we are exposed to daily. Theresa is a health care professional, healer, and an international course leader "Your Personal Inner Colour".

Did you know that:

- You and your body's colour energy form your life
- You have a colour energy flow on different planes simultaneously, without any awareness, the physiology, emotional and the spiritual.
- Everything with a name can be changed into a colour.
- Practical and theoretical activities can be changed into different colours and vice versa.
- You can see your own colour in the alphabet.
- You can calculate your colour energy with the help of numbers.
- You can hear your colour energy in sound, speech, songs, music and in tones from instruments.
- To see and experience your colour-energy around you can make your life much richer.
